Qualifying & Race Performance

Seasons 1950–2026 · No filters active

From pole, 43% of starts ended in a win, and the average qualifying lap was 2.4% slower than the fastest of its session.

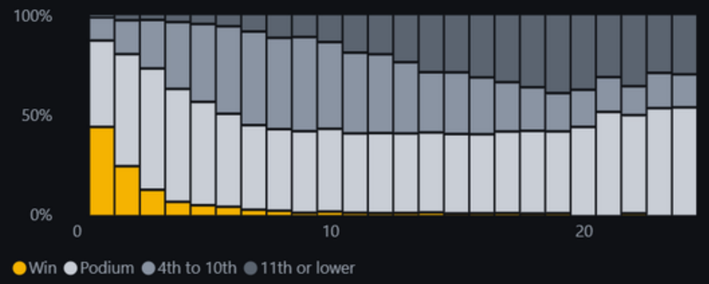

Season in progress: 2026 has 17 of 23 races run. It is included in counts but awards no title until it ends.

Era: All | Season range: 1950 – 2026 | Driver: All | Constructor: All | Circuit: All | Reset filters

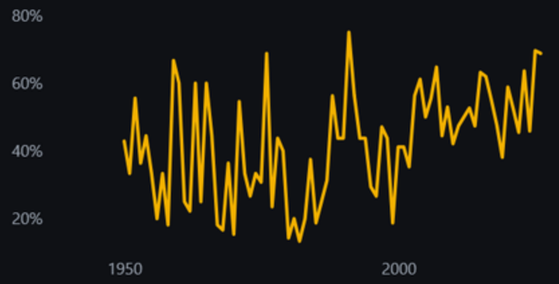

A start from pole wins 43% of the time; from fifth, 4%

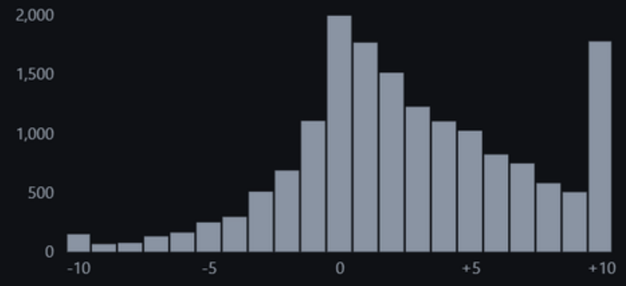

What happens from each slot (amber = win)

Poles that became wins, by season

Places gained or lost from the grid (capped at 10)

Lewis Hamilton led the most laps: 5,531

Qualifying records (top 15 by poles)

Driver	Poles	Avg gap	Q3s	Sessions
Lewis Hamilton	107	0.60%	354	394
Sebastian Vettel	57	1.03%	221	296
Max Verstappen	53	0.74%	223	245
Michael Schumacher	36	1.11%	45	188
Nico Rosberg	30	0.94%	158	205
Charles Leclerc	24	1.02%	153	190
Fernando Alonso	22	1.59%	241	425

69% of Grands Prix in view have lap data (first season with laps: 1982).

Qualifying records cover 33 seasons in view, from 1994 (partial in the early years).

Race pace: median lap of the field, by season (lap data only)

The average qualifying lap was 3.0% off the fastest in 1994 and 1.3% in 2025

Reset filters

Pit-stop records cover 33 of 77 seasons in view, from 1994. Times are entry-to-exit pit-lane time, not the stationary stop.

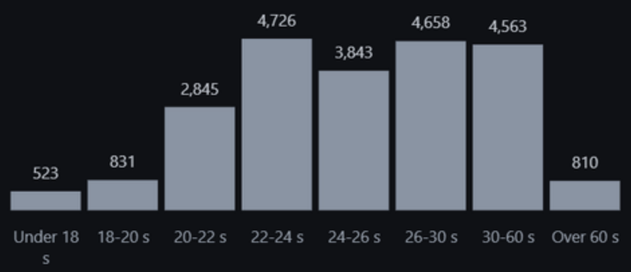

Typical pit-lane time by season (seconds, entry to exit)

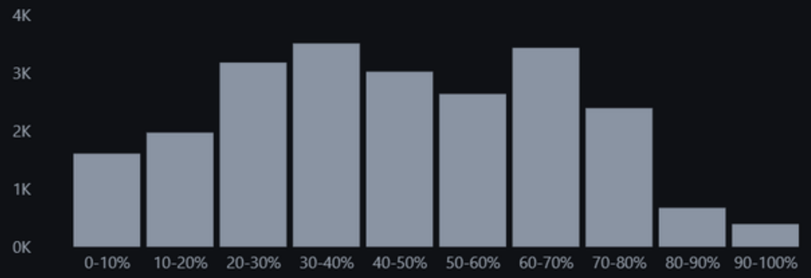

Stops per car peaked at 2.5 in 2011

How long stops take in the pit lane

When in the race stops happen (share of race distance)

Pit-lane time by team (fastest 6, 30+ stops)

Fastest recorded pit-lane times and gap to the race median

Race Date	Driver	Constructor	Time (s)	vs race median
23/08/2009	Luca Badoer	Ferrari	8.8	-12.2
02/04/2006	Ralf Schumacher	Toyota	10.2	-12.1
04/07/2004	Nick Heidfeld	Jordan	11.0	-10.2
30/07/2006	Tiago Monteiro	MF1	11.1	-11.4
04/07/2004	Giorgio Pantano	Jordan	11.1	-10.2
24/07/2005	Jarno Trulli	Toyota	11.1	-11.9

How starts ended (also the fallback for seasons without pit data)

Read this page carefully

Pit-stop time here is the time from pit-lane entry to exit, normally 15 to 30 seconds. It is not the stationary time spent changing tyres, which this dataset does not contain.
Stops over 60 seconds are counted as extended and kept out of the typical time.
Pit stops are recorded from 1994. Differences between teams or seasons are not proof of cause.

F1 Through the Eras

Seasons 1950–2026 · No filters active

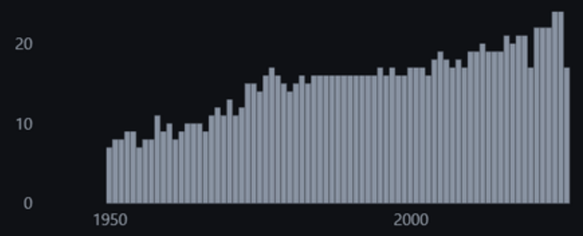

From 1950 to 2025 the calendar went from 7 to 24 races, retirements fell from 49% to 11% of starts, and the scoring system changed 8 times.

Season in progress: 2026 has 17 of 23 races run. It is included in counts but awards no title until it ends.

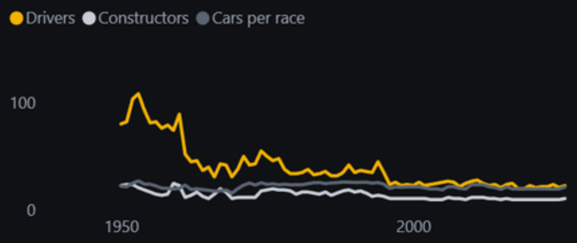

Era: All | Season range: 1950 – 2026 | Driver: All | Constructor: All | Circuit: All | Reset filters

Read this before comparing eras
Scoring systems, calendar length and reliability changed over time, so raw totals are not comparable. Compare rates and era-normalised points instead; eras here are plain calendar decades.

The calendar went from 7 races in 1950 to 24 in 2025

Drivers per season went from 80 in 1950 to 21 in 2025

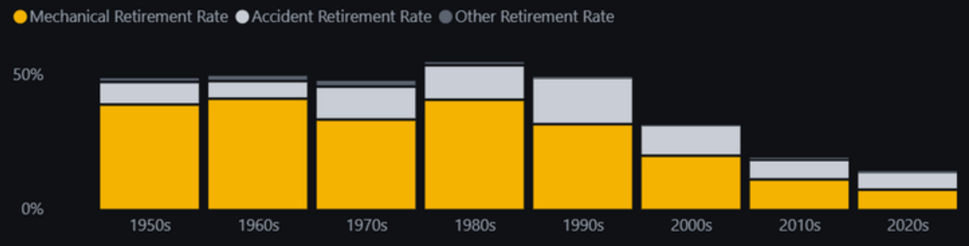

Scoring systems in the data: seasons where it changed

Season	Scoring System
2010	Win 25 / 2nd 18
2003	Win 10 / 2nd 8
1991	Win 10 / 2nd 6
1961	Win 9 / 2nd 6
1954	Win 8 / 2nd 6
1952	Win 8.5 / 2nd 6

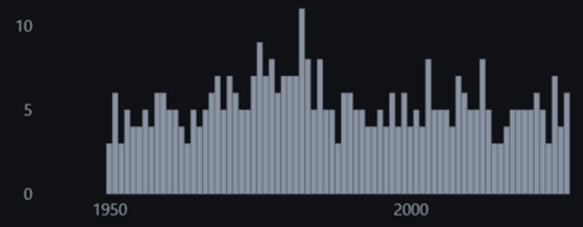

Decade summary

Era	Races	Top driver share	Retired	Pole to win	Classified	Best era-norm. pts
1950s	84	28%	48.4%	38%	52.1%	59%
1960s	100	25%	49.2%	36%	55.4%	42%
1970s	144	12%	47.4%	37%	54.5%	46%
1980s	156	25%	54.3%	28%	47.5%	43%
1990s	162	22%	48.8%	43%	53.6%	46%
2000s	174	22%	31.0%	50%	70.4%	65%

Retirement causes per start, by decade (mechanical in amber)

Most open season: 1982, with 11 different winners

Dominance of the top driver: win share times points share

Seen in the dataset
Results, grids, status and points for every Grand Prix; standings; qualifying from 1994, lap times from 1982, pit stops from 1994.

External context (not in the dataset)
Regulations, engines, tyres, safety and budgets help explain these trends but are not measured here. Treat any link as background, not proof.

Data Quality & Coverage

Seasons 1950–2026 · No filters active

13 of 15 tables pass the integrity checks; 1 warns and 1 fails. Each is explained below.

Season in progress: 2026 has 17 of 23 races run. It is included in counts but awards no title until it ends.

Tables passing	Tables with warnings	Tables failing
13	1	1

How to read the checks
Pass: nothing to flag. Warn: explained by the data (shared drives, removed duplicate laps, coverage gaps). Fail: a real defect, such as a key with no matching row. Every figure is computed from the model or the raw files.

Loaded tables: rows, span and key checks

Table	Rows	First season	Last season	Duplicate keys	Unmatched keys	Status
Circuit	78			0		Pass
Constructor	214			0		Pass
Constructor Results	13,052	1958	2026	0	0	Pass
Constructor Standings	13,818	1958	2026	0	0	Pass
Date	28,124	1950	2026	0		Pass
Driver	865			0		Pass
Driver Standings	35,741	1950	2026	0	0	Pass
Finishing Status	141			0		Pass

Raw files vs what was loaded

Raw file	Raw rows	Loaded	Removed	Dup. keys	Null cells	Status
circuits.csv	78	78	0	0	0	Pass
constructor_results.csv	13,052	13,052	0	0	13,035	Pass
